

FE (Lab) Project: Reading, Synthesizing and Writing

Course Code: SL-1012

Course title: Functional English (Lab)

Section: CS-1K

Name of Group Members:

Roll #:

Weightage: 05

Marks: 30

Deadline: December 02, 2024

Important Notes:

1. Marks will be deducted for the project submitted after December 02, and before December 06. After December 06, submission will be closed.
2. Only the group leader is supposed to submit the documents on the behalf of the whole group.
3. Plagiarized AI tool assisted projects will not be graded.

Project Overview:

Individual Research, Group Synthesis:

- **Individual Phase:** Each student conducts individual research on a specific aspect of the topic.
- **Group Phase:** Students form groups to discuss and synthesize their findings, culminating in a collaborative synthesis paper.

Step-by-Step Guide:

- **Phase 1:** Make groups of 6 members.
- **Phase 2:** As per the assigned topics(on GCR), sit with your group and decide one perspective to be researched by each group member (total of 6-7 perspectives as per the members of your group), for this research, each group member will find an authentic text to read. The text can be a research paper, book (book chapter), or web article.

For example, for the topic 'Education in Pakistan' some different perspectives can be:

- a. Educational policies in Pakistan.
 - b. Access to education in remote areas of Pakistan.
 - c. Public vs. private educational institutes in Pakistan.
 - d. Multiple boards system in Pakistan.
 - e. Reasons for illiteracy in Pakistan.
 - f. Solutions to increase literacy rate in Pakistan.
- **Phase 2:** Each member will gain exposure to different perspectives by **reading and annotating** the researched text.
 - **Phase 3:** The entire group will sit together and share the insights gained by the papers.
 - **Phase 4:** Synthesize the information and insights for the assigned topic, and prepare a written draft.

- **Phase 5:** Revise the draft based on peer feedback, and write the final synthesized report of 300-350 words.
- **Phase 6:** Ensure a clear write up by adhering the structure mentioned in the lab manual. Give complete reference and URL of the sources at the end of your write-up.

Good Luck!
